PROJECTS

2022 – 2023
Nov – Jan   **ATTENDANCE MANAGEMENT SYSTEM**
Build an Fully Autonomouse Attendance Management System With User Role, Log, Checking, Geo Tracking, Hardware Detection and Face Recognition System, etc

Feb – Apr   **E-COMMERCE WEB APP**
Built an eCommerce Web App With Proper Checkout User Cookies For One day, Admin Panel, User Dashboard, Billing and Shipping System, Real Mail Send to User Order Invoice and finally Payment Gateway Integration, etc. by Using PHP Laravel and Ajax.

Apr – May   **PRONOOR**
The project is a web application designed to provide a comprehensive solution for It service provider applications. The application consists of a RESTful API developed with PHP Laravel, which serves as the backend for data management, and a Vue.js frontend that powers the user interface.

Jun – July   **BUSINESHALAVISTA**
The website is built using raw PHP, a widely used server-side scripting language for web development. Raw PHP provides flexibility and control, allowing for custom development tailored to the specific requirements of the project. By leveraging raw PHP, the website benefits from optimized performance,
